

Nominations for General Staff Representative on UniSuper Consultative Committee

The Australian National University has called for nominations from General Staff who are full UniSuper members to be a member of the UniSuper Consultative Committee.

The role of a member of the Committee is essentially to advise the Trustee on matters of difficulty about the application of the Deed, general matters about the Deed and any other matter about which the Trustee required advice.

Two nominations have been received as follows:

Nathan Asher

I have been a member of UniSuper since 1996. My background is in service and support to staff and students including six years in Human Resources involved directly with UniSuper. I occupy the role of Associate Registrar at ANU. This involves developing central administration functions for students from Admission through to Graduation. I am a Bachelor of Arts and Master of Business. I offer my knowledge, service and support experience to represent ANU General staff on this important committee.

Nathan Asher
Associate Registrar
The Australian National University.

Derek Corrigan

If elected I would represent the interests of general staff by –

- defending the 17% employer contribution to protect retirement security against future reform agendas;
- ensuring UniSuper remains the preferred and default superannuation fund while still maximizing the flexibility of options available to members;
- maintaining policies that support strong financial performance and, if practical, an ethical investment strategy;
- increasing the categories of staff eligible for the full 17% employer contribution entitlement.

As a committed staff member and unionist I am continuing to represent staff on ANU committees and am informed by my responsibilities on the NTEU National Executive and National Finance Committees.

Derek Corrigan
